Comments: The UAA was conducted in July 2005 and no WBCR was observed at the six sites evaluated. The stream met both the average and maximum depth criteria at four sites and met the average depth criterion at one site. Based on this survey and one conducted by Golden City (UAA#0436), the committee recommends removing WBCR upstream of the confluence with Kyle Creek (south of site 3188-296) and retaining WBCR from the confluence with Kyle Creek downstream to the Class P segment.

**Committee Recommendation:** ☐ Retain Use ☒ Modify Use ☐ Remove Use ☐ Inconclusive
